Daniel Njoku

+2349029665563 | Njokudanny234@gmail.com | PortHarcourt, Nigeria

Summary

I am a Backend and Machine Learning Engineer with frontend experience, passionate about building **scalable, secure, and intelligent systems** for SaaS, e-commerce, and AI-powered applications. I work with **FastAPI, Django, Spring Boot, Laravel, React/Next.js, Flutter**, and modern ML frameworks (**PyTorch, TensorFlow, Scikit-learn**) to deliver **real-world, production-ready solutions**. I enjoy collaborating with teams, solving challenging problems, and bringing innovative ideas to life.

Education

FreeCodeCamp | Online
Scientific Computing with Python | 12/2025
Certification

Sololearn Inc | 1521 Alton Road, #247
Python Intermediate | 01/2026
Certification

APIsec University | San Francisco, California
API Security Fundamentals | 03/2026
Certification

Havard | Online
Introduction to Computer Science | 05/2025

- Learned **C Programming, algorithms, data structures,** and **memory management fundamentals**
- Gained experience in **problem-solving, debugging, and low-level programming concepts**
- Certificate: *Pending*

Projects

Health101 – Health & AI App | **Python, FastAPI, Render Cloud, Dart, Flutter, Bloc:**

- Built a **Flutter mobile application** integrated with **Django REST Framework APIs** for health content delivery.
- Implemented **secure data handling**, API authentication, and real-time communication between mobile and backend.
- Currently training and deploying **Heart Failure Prediction AI models**, using **Pandas and Scikit-learn for data cleaning**, **PyTorch for deep learning**, and integrating AI inference into the app.
- Designed **AI deployment pipelines** to allow predictive analytics directly in production while maintaining responsive user experience.

Vivid Gen – AI SaaS Platform | **Python, FastAPI, PyTorch, TypeScript, React, Next.js:**

- Developed a **highly advanced AI SaaS platform** for **portrait video generation and TTS (Text-to-Speech)**, integrating WaveSpeed avatars and dubbing APIs for realistic AI-driven media.
- Leveraged **PyTorch** and other cutting-edge Python AI libraries to build **custom neural models** for portrait animation and voice synthesis.
- Implemented a **scalable API system with FastAPI**, serving AI model inference requests efficiently on **Modal GPUs**.
- Designed a **SaaS credit-based system** using **Polar.sh**, enabling controlled access and billing for AI services.
- Built a **modern frontend with TypeScript, React, and Next.js**, providing real-time previews and user-friendly AI media interactions.

StreamSphere – Media Streaming Platform | **Python, FastAPI, Docker, AWS Cloud, Dart, Flutter:**

- Built **secure FastAPI endpoints** with **AWS S3 presigned uploads** for media content, ensuring efficient and safe file handling.
- Implemented **SQS consumers with retry logic**, handling asynchronous media processing with **FFmpeg transcoding** pipelines.
- Integrated **AWS Cognito** for authentication, enabling secure and scalable user management.
- Developed **real-time streaming features** with Flutter frontend, providing seamless cross-platform media access.
- Focused on **performance and scalability**, leveraging Docker containers and AWS cloud architecture to handle high-volume media traffic.

Credit Card Fraud Detection System | **Python, Pandas, Scikit-learn, PyTorch** ***Data Science & Machine Learning Project***

- Building a **supervised learning model** to detect fraudulent transactions in credit card data.
- Performing **data cleaning, feature engineering, model training, and evaluation**.
- Applying **machine learning techniques** to improve detection accuracy and reduce false positives.

Spam & Ham Detector | **Python, Scikit-learn, Pandas, NLP** ***Machine Learning Project***

- Developed a **spam/ham classification model** using supervised learning.
- Preprocessed textual data, implemented **vectorization techniques**, and trained classification models for accurate email detection.
- Evaluated model performance using standard metrics and optimized for real-world deployment.

Experience

CodSoft | Remote
Python Intern (ML & AI) | 12/2025 - 01/2026

- Gained hands-on experience in **Machine Learning, Artificial Intelligence, and Data Science** through practical, real-world projects in a collaborative team environment.
- Contributed to the development of an AI-based system for **diabetes prediction** using supervised learning techniques, focusing on data preprocessing, model training, and evaluation.
- Worked with industry-relevant tools and libraries including **NumPy**, **Pandas**, **Matplotlib (Pyplot)**, **Seaborn**, **Scikit-learn**, **PyTorch**, and **TensorFlow** for deep learning applications.
- Collaborated with team members to design, test, and optimize machine learning models, improving **Theta** accuracy and efficiency.

SpecsTech Africa Solutions | Enugu, Nigeria
Junior software developer | 05/2024 - 03/2025

- Assisted in the development of full-stack Laravel PHP projects for clients by supporting both front-end and back-end tasks within a team.
- Acquired knowledge in WordPress development and aided in the creation of a custom currency converter plugin using PHP.
- Gained practical experience in web application development, plugin creation, and solutions for clients.
- Conducted manual and functional testing on features prior to delivery to ensure reliability and minimise defects.

Upwork | Remote
Freelance Full-Stack Developer | 09/2023 - 05/2024

- Built cross-platform mobile apps with Flutter and React Native, delivering smooth, user-friendly experiences for clients.
- Assembled and led a small freelance team to handle larger projects, coordinating tasks with Git-based workflows and CI/CD pipelines and cloud deployment.
- Designed and implemented scalable backend systems with FastAPI, Django REST Framework, Laravel and Spring Boot focusing on clean architecture and performance.

Skills

Programming Languages
Python, JavaScript, C, TypeScript, Dart, PHP, Java, HTML, CSS

Backend Development
FastAPI, Django & DRF, Flask, Node.js, Spring Boot, Laravel
REST API Development, GraphQL, Pydantic, Authentication & Authorization, API Design, Microservices Architecture

AI / Machine Learning & Data Science
PyTorch, TensorFlow, Scikit-learn, Supervised Learning, Model Training & Evaluation, Data Preprocessing, Feature Engineering

Libraries & Tools
NumPy, Pandas, Matplotlib (Pyplot), Seaborn, Jupyter Notebook

Frontend & Mobile
React, Next.js, React Native, Flutter, Tailwind CSS, WordPress

Developer Tools & Cloud
AWS Cloud, Docker, Git, GitHub, GitLab, Postman, Render Cloud, Modal GPU, Inngest, FFMPEG
